Protect what's worth

Queue Reader allows you to tackle human errors
and protect your customers' brand

Queue Reader allows you to tackle human errors and protect your customers' brand

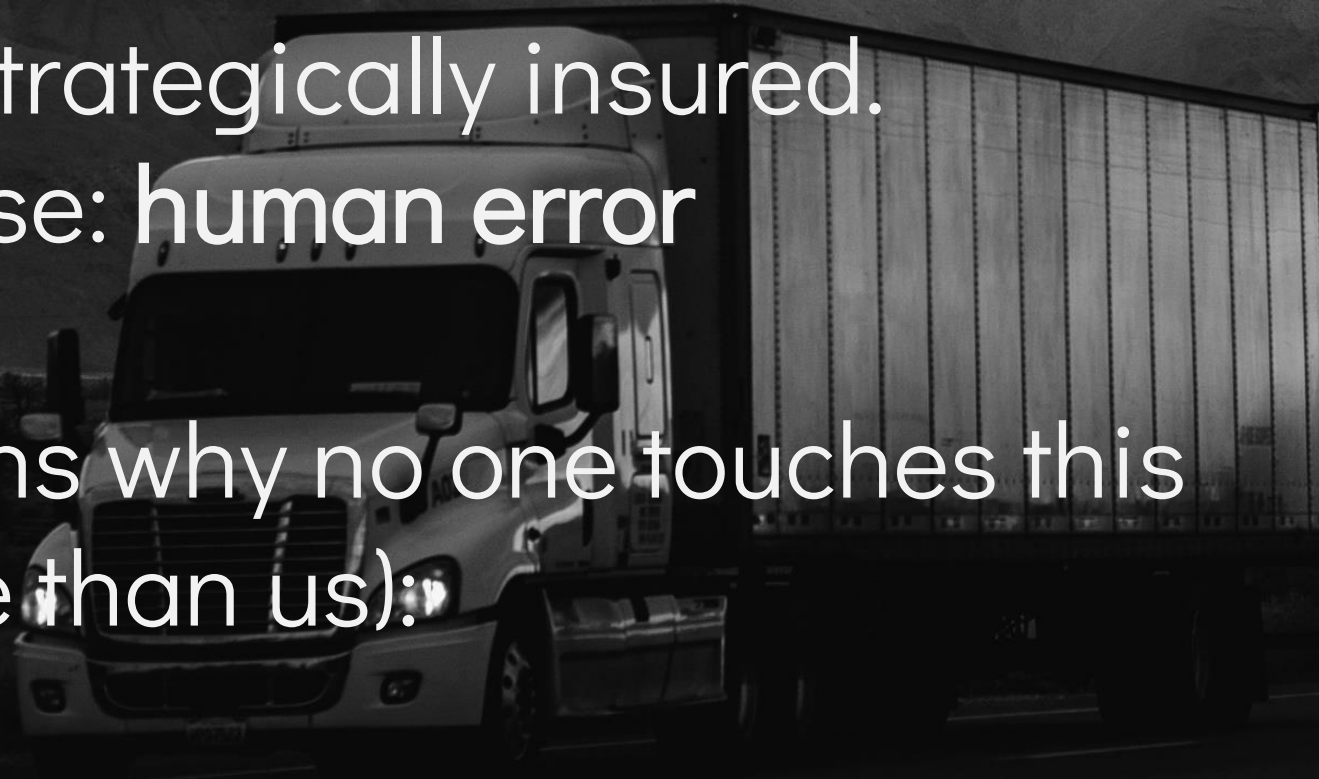

By using dirt cheap tools. Really, really cheap. You will basically give them a gift.

What we heard

Food cargo is strategically insured.
EXCEPT one case: human error

A million reasons why no one touches this
(you know more than us):

- Exploits
- Off the roof cost

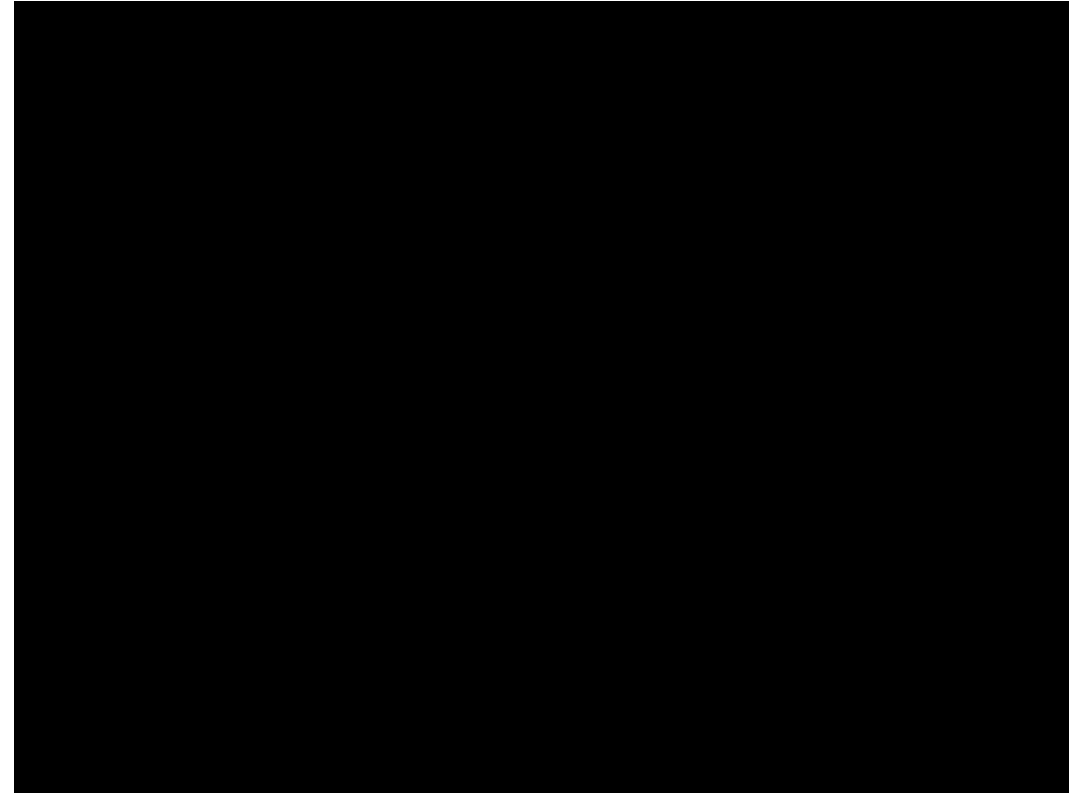

What we heard

Two reasons to tackle it:

Supply chain enhancement

Value chain enhancement

Supply chain
Value chain

What can you do

- Identify a priori
- Protect your customer (and your customer's customers)

How can you do it

Special contract for your customers who adopt
a no-go indicator for edibles

You will even reward them by funding all of the system

No-one says no to brand protection and free advertisement

How can you do it?

You can monitor goods using dasda
sensors sadasf IoT

How can you do it?

You can monitor goods using dasda
sensors sadasf IoT asdfg blockchain
random buzzword fafsfgg

You guys are lying I'm out

You can monitor goods using dasda
sensors sda asdfg blockchain
random buzzword sfgg

EXPENSIVE & COMPLEX

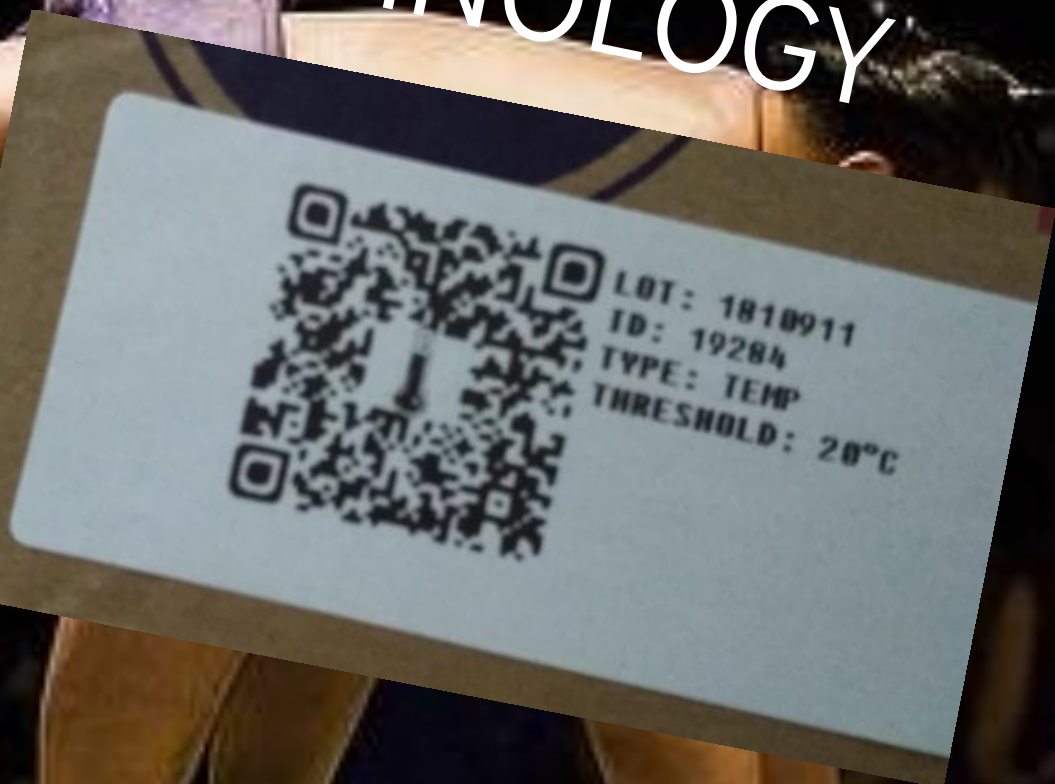

Our unfair advantage

OUR
DIRTY-CHEAP
TECHNOLOGY

*Generic Buzzword
solution*

OUR
DIRTY-CHEAP
TECHNOLOGY

Our unfair advantage

Generic Buzzword
solution

Our unfair advantage

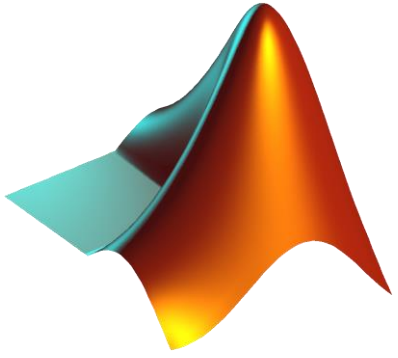

Use an established pipeline

Scanning in delivery stations

Trivial image processing requirements

Printing costs already included in deals

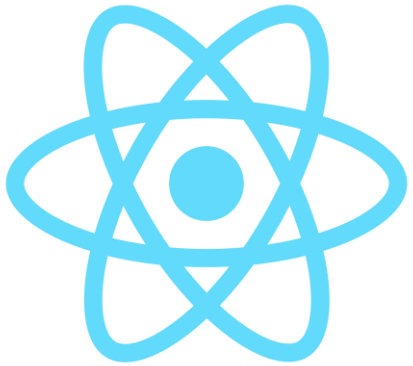

Technologies

Feature extraction

Pattern recognition

Classification (everybody stop calling everything AI)

Image/file parsing

UI

Data visualization
